CHANDRA LEKHA GANTA

Data Analyst

+1 936-206-1480 | chandralekhaganta7@gmail.com | www.linkedin.com/in/chandra-lekha-ganta | Github | Woodridge, IL | Open to Relocation

Profile Summary

- Data Analyst with **5 years of experience** delivering data analysis, reporting, dashboarding, and data-quality solutions across audience, public safety, retail, and operational datasets.
- Skilled in **SQL, Python, Pandas, NumPy**, and **Excel for data extraction**, transformation, exploratory analysis, validation, reconciliation, and business analysis.
- Experienced in developing **analysis-ready datasets** and **ETL workflows** using Amazon Redshift, Amazon Athena, Amazon S3, AWS Glue, Azure Data Factory, and Azure Synapse Analytics.
- Proficient in building **Power BI and Tableau dashboards**, DAX measures, KPI reporting, trend analysis, and stakeholder facing visualizations while performing data quality checks and root-cause analysis.
- Experienced in **REST API integration**, **BRD/FRD documentation**, **UAT, Agile collaboration**, and stakeholder communication, translating business requirements into reliable datasets and actionable reporting.

Technical Skills

SQL & Databases: SQL, SQL Server, Oracle, PostgreSQL, Amazon Redshift, Amazon Athena, Azure Synapse Analytics, Azure SQL Database, Snowflake, Databricks, CTEs, Window Functions
Python & Data Analysis: Python, Pandas, NumPy, Jupyter Notebook, Exploratory Data Analysis
BI & Dashboards: Power BI Desktop, Power BI Service, DAX, Tableau, KPI Reporting, Dashboard Development
Excel & Reporting: Microsoft Excel, PivotTables, VLOOKUP, INDEX/MATCH, Excel Charts
Cloud & Data Platforms: AWS, Amazon S3, AWS Lambda, Microsoft Azure
ETL & Data Integration: SSIS, Azure Data Factory, AWS Glue, REST APIs, JSON, CSV, Data Integration, Data Transformation, Source-to-Target Mapping
Data Quality & Validation: Data Profiling, Data Cleansing, Data Validation, Data Reconciliation, Data Integrity, Duplicate Detection, Root-Cause Analysis
Version Control & Delivery: Git, UAT, Requirements Documentation, BRDs, FRDs, Agile, Scrum
Professional Development: SQL Analytics on Databricks (Databricks Academy), Generative AI Explained (NVIDIA), Scrum Fundamentals (SCRUMstudy)

Work Experience

HOLIDAY CHANNEL — Chicago, IL

Data Analyst — May 2026 – Present

- Built audience-performance reporting using **Amazon Redshift**, optimizing SQL joins, CTEs, and window functions to support programming and advertising inventory reviews.
- Validated reporting data across **Amazon S3 and Amazon Athena** using Python, Pandas, and NumPy to reconcile source-to-target results and improve data accuracy.
- Developed **Power BI dashboards and DAX measures** to resolve KPI discrepancies, standardize reporting logic, and provide consistent performance metrics.
- Integrated **REST API data using AWS Lambda, AWS Glue, and Amazon S3**, transforming JSON and CSV inputs into analysis-ready datasets for reporting.
- Conducted **QA, UAT, data reconciliation, and root-cause analysis**, using AI-assisted analysis and documentation to investigate reporting issues and data-quality gaps.

- Gathered business requirements and created **BRDs and FRDs**, collaborating with Agile teams while using SQL, Python, Excel, and Git to support reporting validation, ETL workflows, and issue resolution.

COOK COUNTY SHERIFF'S OFFICE
Chicago, IL

Research & Data Analyst Intern
Jun 2025 – May 2026

- Used **SQL and Azure Synapse Analytics** to clean, validate, and normalize **2,500+ incident records** across multiple law enforcement sources, improving data consistency for analysis and reporting.
- Built **Azure Data Factory and SSIS** workflows to integrate, transform, validate, and prepare investigative data from multiple source systems for analytical reporting.
- Developed **Tableau dashboards and Excel reports** covering **500+ weekly organized retail crime data points**, highlighting crime trends, case activity, hotspots, and key operational indicators.
- Conducted **UAT, data validation, reconciliation, and quality checks**, verifying data accuracy, completeness, functionality, and alignment with business requirements.
- Converted **unstructured case notes and incident logs into structured datasets**, created **BRDs/FRDs**, and used SQL to analyze incident patterns, dispositions, and conviction trends.
- Managed **200+ State ID applications and 300 active cases**, performing data cleaning, validation, reconciliation, weekly performance reporting, KPI tracking, and trend analysis to identify missing information and program process gaps.

VIHAWK TECH SOLUTIONS
Hyderabad, India

Operations Reporting Analyst
May 2020 – Nov 2023

- Built recurring **revenue, operational, and KPI reports** using SQL, Python, Pandas, and Excel, combining source data and curated datasets into reliable reporting outputs.
- Optimized complex SQL reporting queries using **CTEs, window functions, joins, aggregations, and validation checks**, improving reporting performance and reliability.
- Created controlled **PostgreSQL staging views and transformation logic** within read-only source environments to support new reporting requirements without modifying upstream systems.
- Performed **data profiling, validation, reconciliation, and root-cause analysis** to identify duplicates, inconsistencies, and source-to-target discrepancies across reporting datasets.
- Developed and maintained **reporting datasets and transformation workflows**, applying data-cleansing and validation rules to improve data accuracy, consistency, and integrity.
- Collaborated with business stakeholders to define **KPIs, metric definitions, reporting requirements, and validation rules**, documenting requirements and supporting consistent reporting across teams.

Analytics Projects

Improving Engagement and Revenue Through Email Analytics | Labelmaster (DePaul MS Capstone) Fall 2025

- Analyzed 4 years of email campaign data, covering **millions of engagement events**, using **SQL and Snowflake** to identify gaps in open rates and recommend targeting and timing changes to improve engagement.
- Built **3 interactive Tableau dashboards** connected to **Snowflake** for email engagement, sales performance, and YTD campaign revenue analysis.

Calmpanion – AI-Powered Stress Management Chatbot

- **Fine-tuned LLaMA using Hugging Face Transformers** on a mental health dataset and integrated **OpenAI Whisper for speech-to-text input**, supporting both voice and text interactions.
- Collaborated with a team to conduct **user testing with 50 participants**, evaluated chatbot responses, and optimized the application workflow to **reduce response time by 30%**.

Education

DEPAUL UNIVERSITY, KELLSTADT GRADUATE SCHOOL OF BUSINESS
Chicago, IL

Master of Science in Business Analytics • GPA : 4.0
Jan 2024 – Nov 2025
